

Bilateral training with RAAF and trilateral unit-level exchanges

28-30 March, Japan Air Self-Defense Force (Koku-Jieitai) conducted bilateral training with the Royal Australian Air Force (RAAF), and bilateral and trilateral (Japan-US-Australia) unit-level exchanges at Hyakuri Air Base. RAAF P-8A and Koku-Jieitai RC-2 conducted flight trainings and both aircraft landed on Hyakuri Air Base.

This event contributes to growing interoperability and familiarity between our forces and contributes to upholding and reinforcing “Free and Open Indo-Pacific.” Koku-Jieitai will continue to establish readiness for smooth cooperation with other countries at the opportunities of international training and exchange.
