

Japan-Philippines Aviation Medicine Exchanges

From June 10 to 17, as part of an aviation cooperation project with the Philippines, an invitational activity in the field of aviation medicine was implemented for Philippine Air Force (PAF) personnel. The PAF personnel visited the Koku-Jieitai (JASDF) Aeromedical Evacuation Squadron, Hamamatsu Air Rescue Squadron and Aeromedical Laboratory, where they discussed and received briefings on aviation medicine.

This project will contribute to upholding and enhancing FOIP (Free and Open Indo-Pacific) by enabling the Philippine Air Force expand its operations.
