

## Participation in USSF's Women in Space Symposium

---

From August 26 to 27, Koku-Jieitai (Japan Air Self-Defense Force) participated online in Women in Space Symposium hosted by U.S. Space Force with the United Kingdom, Australia, Spain, and Canada. A female participant from the Space Operations Group joined in the panel discussion, along with space-related participants from other countries. She talked about the importance of collaboration with the United States and partner countries in promoting space security cooperation, and the active role of women on the job in Koku-Jieitai and the Ministry of Defense, resonating with other participants. This has contributed to enhanced collaboration through deepening of mutual understanding.

Koku-Jieitai will continue to cooperate with the United States and partner countries in a wide variety of areas.
