

Royal Australian Air Force KC-30A's visit to Japan

On March 29, Royal Australian Air Force (RAAF) KC-30A arrived at the Komaki Air Base, Koku-Jieitai (Japan Air Self-Defense Force). From April 3 to 27, Koku-Jieitai and RAAF are conducting Air-to-Air Refueling Compatibility Test between F-15(Koku-Jieitai) and KC-30A(RAAF). The test will contribute to the enhancement of interoperability between our forces, which was agreed to be promoted at the Japan-Australia 2+2 Foreign and Defense Ministerial Consultations in December 2022. Koku-Jieitai will uphold and reinforce the Free and Open Indo Pacific through such activities.
