

Deployment Ceremony of F-35A at Komatsu Air Base

On April 26, the deployment ceremony of the F-35A was held at Komatsu Air Base, Koku-Jieitai.

Defense Buildup Program formulated in 2022 states that Japan's air capability will be further refined and strengthened through the introduction of F-35A fighters. Komatsu Air Base is the second deployment location in Japan for F-35A, following the Misawa Air Base.

Koku-Jieitai will further strengthen its air defense posture as the security environment surrounding Japan becomes more intense, and will maintain the necessary posture to contribute to regional peace and stability.
