

Participation in the multilateral exercise Global Sentinel 2025 hosted by USSPACECOM

From April 28 to May 9, space operators of Koku-Jieitai (JASDF) participated in the SSA (Space Situational Awareness) multilateral exercise “Global Sentinel 2025” hosted by USSPACECOM at Vandenberg SFB in California, U.S. alongside 30 other nations and organizations.

Through this opportunity, they sharpened their skills to effectively share SSA information with their international colleagues. They also discussed with allied and partnered operators about their insights and best practices to identify space-related threats.

Koku-Jieitai will continue to steadily reinforce our space capabilities and readiness to contribute to the stable use of space which is indispensable for Japan's national security and the shared interests of the international society.
