

Discharging and leaving of the Ukrainian injured soldiers who have received rehabilitation at JSDF Iruma Hospital

The Ukrainian injured soldiers who were admitted to Iruma Hospital in JASDF Iruma base on April 24 for their rehabilitation were discharged safely on May 29. Our hospital received the patients whose rehabilitation programs were established at National Defense Medical College (NDMC) Hospital and contributed to its accepting new soldiers. We will continue to provide our utmost support to Ukraine, closely cooperating with the international community.

JSDF Iruma Hospital is the only hospital adjacent to an airfield, that has an aero-medical function. In such an event as a large-scale disaster, our hospital is expected to play an active role in patient transport.
