Realize your dreams

ABIT Corporation

Connectivity beyond the horizon

ABIT's CubeSat comms module delivers reliable satellite links (S/X/Ka-band) to forces where terrestrial networks do not reach, and our ultra-compact SAR with electronically steered Phased Array Antenna enables persistent, all-weather surveillance of wide areas — with real-time downlink for immediate tactical decision-making. Designed and made in Japan.

Hytec Inter Co., Ltd.

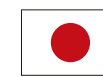

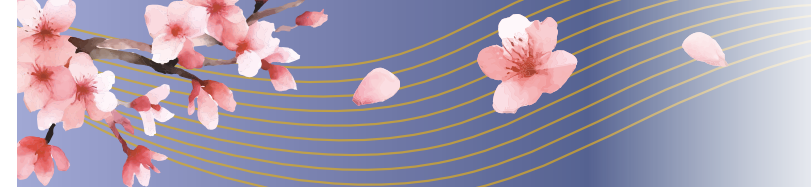

Tactical Video Encoder/Decoder

LLC-4000 is a high-performance 4K low-latency video encoder/decoder designed for tactical operations, reconnaissance, and situational awareness.

It enables reliable real-time video transmission over narrow-band satellite and tactical radio links in bandwidth-limited environments.

LLC-2000 retains the same performance at 2K while offering a lighter, more compact design optimized for portability and drone integration.
